

# East Rock Global Magnet School

K-8 Public School  
Willow St, New  
Haven CT  
exterior mural

20ft x 30ft

Mural was  
produced under  
the direction of  
JoAnn Moran with  
22 student design  
team, intern  
Eamon Linehan  
and painted by the  
entire student  
body.

The frame of the mural was signed by  
students with painted handprints.

Students designed a  
flag for the school  
representing  
harmony between  
earth, air, water and  
all living things.

Their design goal was to represent the diversity in the "Global" school population portrayed by creatures from each continent that also represent character important character traits. Taking knowledge gained through education to reach your highest goals and dreams- represented by the paper people coming from the pages of a book, climbing the pencil ladder holding the flag and reaching for the stars.

This mural was created with the expectation that the school was going to be demolished for new construction; it is with great hope that the mural will be incorporated in the new school design.
